THE NEW FRONTIERS OF PHILANTHROPY:
* A Guide to the New Actors and Tools that are Reshaping Global Philanthropy and Social Investing *

Edited by Lester M. Salamon

With the resources of both governments and traditional philanthropy barely growing or in decline and the problems of poverty, ill-health and environmental degradation ballooning daily, it is increasingly clear that new models for financing and promoting social and environmental objectives are urgently needed. Fortunately, a significant revolution appears to be underway on the frontiers of philanthropy and social investing that is providing at least a partial response to this dilemma. This new book examines the new actors and new tools that form the heart of this revolution and shows how they are reshaping the way we go about supporting solutions to social and environmental problems throughout the world.
